Kunal Udhar

Mobile Application Developer | Flutter & Android

I'm a Flutter Developer who builds clean, high-performance mobile apps with a strong focus on UI/UX and real-world usability. I enjoy turning ideas into scalable, user-friendly applications and continuously improving my skills in API integration and state management.

Junior Flutter Developer
MHTECHIN™

09/2025 - Present   *Aurangabad, Maharashtra*

Achievements/Tasks
- Improved application functionality and reliability through efficient API integration
- Contributed to the **end-to-end development** of a **Library Management Application** , building the **user-side in Flutter** and integrating it with a **Golang backend** .
- Contributed to the **end-to-end development** of a **School Website for Students** , building the **user-side in** React and integrating it with a **Golang backend** .

ORGANIZATIONS

MHTECHIN (06/2025 - Present)
Full Stack Android Developer

PERSONAL PROJECTS

BloodConnect – Blood Donation Mobile Application (11/2025 - Present)
- BloodConnect is a Flutter-based mobile application designed to connect blood donors. The application enables users to find nearby donors based on location and blood group, post urgent blood requests, track donation history, and receive real-time notifications. It also provides map-based navigation to hospitals and donor locations, helping improve response time during emergencies

Portfolio Website (Complete)
- Developed a responsive Flutter Web portfolio and deployed it on Firebase Hosting

Work Management Desktop Application (Complete)
- A smart and efficient Work Management **desktop application frontend** developed using Flutter, designed to simplify task handling and improve productivity for admin and employee users
